

Extend digital video plus digital / analog audio

DVI Audio CAT5 Extender

Extends DVI and digital/analog audio up to 200 feet (60 meters) over two CAT-5 cables.

Our DVI Audio Extender extends your DVI and digital/analog audio up to 200 feet away from your HDTV DVI or HDMI™ source using cost effective CAT-5 cables.

How It Works

The DVI Audio Extender sender unit sits next to your video source such as computer, DVD player or any set-top box. The cables supplied with the DVI Audio Extender connect your video source/audio source to the sender. Your display/audio receiver plugs into the back of the DVI Audio Extender receiver. Two CAT-5 cables* connect the sender and the receiver units to each other.

Note: The DVI Audio Extender is HDCP compliant.

DVI, HDCP & HDMI Defined

* **NOTE:** A shielded CAT-5e or CAT-6 cable for DDC is recommended for optimal video quality. The video CAT-5 cable does not need to be shielded.
