

Application

- For **outdoor** use in structured (data) wiring systems (**campus backbone**).
- For **outdoor** use in networks for telecom, cable TV and/or broadcast.
- **Easy to install** in ducts, tunnels, trenches and/or tubes (by means of compressed air or pulling wire). Suitable for **direct burial** (crush ≤ 150 N/cm).

Key features

- A simple **all dielectric** cable construction (and consequently **more cost-effective up to 24 fibres** than multi-tube cables) with improved rodent protection.
- **Predicted life time > 30 years**.

Construction & dimensions

Cable specifications (construction in accordance with IEC 60794)

1. Primary coated optical fibres: $\text{Ø } 250 \pm 15 \mu\text{m}$.
2. Central tube, jelly filled (**non dripping and silicon-free**) with **up to 24 fibres**.
 Individually colour coded optical fibres:
 1 – 12: red - natural - yellow - blue - green - violet - brown - black - orange - turquoise - pink and white
 13 – 24: red - natural - yellow - blue - green - violet - brown - grey - orange - turquoise - pink and white **with black rings**.
3. Swellable yarns as strength members and for the **longitudinal watertightness and improved rodent protection**.
4. **Blue** UV resistant PE outer jacket.
 Identification: BELDEN OFC – "cable type" – "number x type of fibre" + date-, meter- and P/N- marking.

Dynamic according to IEC 60794-1-2-E6	- 15 x \varnothing

Guide to installation and handling

- When laying and installing optical fibre cables **it is vitally important not to exceed the specified values** set for pulling tension, bending radii and temperature.
The installation methods have to be in accordance with the common standards.
- To ease insertion into tubes by means of compressed air or pulling wire, certified lubricants (e.g. paraffin) may be used. The use of soap or similar substances as lubricants is strictly prohibited.
- If a cable needs to be fastened, constrictions \geq 0.3 mm must be prevented.
- The jelly filling inside the tubes can be removed using a tissue soaked in turpentine.
- It is advisable to cap the cable-ends during storage.

Options

- Cables from **1 to 24 fibres**.
- Universal (halogen-free) cables for outdoor and/or indoor use.
- Non-standard cable constructions**, colours, details and/or additional information regarding specifications are available on request.
