#### Distribute one source to eight displays

With one Component input and eight Component outputs, the 1:8 Component CAT5 Distribution Amplifier is the perfect solution for anyone who needs to send one Component source to multiple displays in remote locations at the same time. The 1:8 Component CAT5 Distribution Amplifier has eight RJ-45 output connectors and one Component input. The 1:8 Component CAT5 Distribution Amplifier's RJ-45 connectors can be connected to up to eight Component CAT5 Distribution Amplifier Receivers using industry standard CAT5/6 cables. The receivers can be placed up to 330 feet away from the transmitter.

#### How It Works

Simply connect your Component video source to the 1:8 Component CAT5 Distribution Amplifier's input using the supplied Component cable. Then connect up to eight Component displays to the Component CAT5 receivers. Plug in the power supply to the 1:8 Component CAT5 Distribution Amplifier and the Receivers will get draw power from the main unit. Note: Component output 1 is the primary connection whose EDID will be used for displays two through eight. The Component displays that are attached to ports two through eight on the 1:8 Component CAT5 Distribution Amplifier MUST have the same native resolution in order to get a picture. The 1:8 Component CAT5 Distribution Amplifier will extend a Component signal OR a composite video w/ L+R analog audio. For this to work, you will need to simply connect your composite video w/ L+R analog audio to the red, green, and blue inputs making sure that you keep the same color order of cabling on the output ports.

**Note:** Power supply connects to sender unit. Receiver is powered through the sender (Receivers not included).

#### Features:

- Easily distribute one source to eight simultaneous displays
- Extends video signals up to 330 feet over CAT-5e
- Supports component video distribution
- Maintains 1080p resolution video
- Allows eight monitors to be connected to the same video source at the same time

#### Specifications:

- Video Amplifier Bandwidth: 350 MHz
- Input Video Signal: 1.2 volts p-p
- Input Sync Signal: 5 volts p-p (TTL)
- Horizontal Frequency Range: 15 - 70 KHz
- Vertical Frequency Range: 30 - 170 Hz
- Video In: HD-15
- Video out: 3 RCA Component
- Link Connector: RJ-45 shielded
- Power Supply: 5 VDC (External)
- Power Consumption: 30 Watts (max.)
- Sender Dimensions: 8.5"W x 1.75"H x 4.5"D
- Receiver Dimensions: 3.75"W x 1.25"H x 2"D
- Shipping Weight: 3 lbs.

#### Package Includes:

- 1:8 Component CAT5 Distribution Amplifier
- 6 foot VGA to Component cable
- One 5V external power supply

#### Product Options:

- How Many Component Receivers do you need?
- 1x Component Receiver (\$125.00)
  - 2x Component Receiver (\$250.00)
  - 3x Component Receiver (\$375.00)
  - 4x Component Receiver (\$500.00)
  - 5x Component Receiver (\$625.00)
  - 6x Component Receiver (\$750.00)
  - 7x Component Receiver (\$875.00)
  - 8x Component Receiver (\$1,000.00)

## OPERATION NOTES

---

### **READ THESE NOTES BEFORE INSTALLING OR OPERATING THE 1X8 COMPONENT CAT5 DA SYSTEM**

- Use industry standard Category-5 (CAT-5) cable to operate the 1x8 Component CAT5 DA system. CAT-5e cable is preferred.
- Please connect all the cables between the computer and the 1x8 Component CAT5 DA system before powering up the 1x8 Component CAT5 DA Sender unit.
- The 1x8 Component CAT5 DA units are housed in a metal box for better RF shielding.

# INTRODUCTION

---

Congratulations on your purchase of the ex•tend•it 1x8 Component CAT5 Distribution Amplifier. Your complete satisfaction is very important to us.

Gefen's line of Home Theater switchers, extenders, and Distribution Amplifiers are designed to make your A/V setup more comfortable, more productive and more affordable.

The 1x8 Component CAT5 DA allows one Component source to be distributed on up to eight displays. The 1x8 Component CAT5 DA also extends Component signals over 330 feet using industry standard Category 5 (CAT-5) Cable. All output displays will have mirrored images.

The ex•tend•it line offers solutions for home theater, A/V installation, data center, information distribution, conference room presentation, school and corporate training environments.

## Our Commitment

Gefen will always offer the finest quality product at the best possible price. Included in that price is a lifetime support from a team of outstanding engineers.

## How it Works

Simply connect your Component video source to the 1x8 Component CAT5 Distribution Amplifier's input using the supplied VGA to Component cable. Then connect up to eight Component displays to the Component CAT5 receivers over 330 feet using CAT-5 Cable. Then power the 1x8 Component CAT5 Distribution Amplifier and the receivers will get power from the CAT5. Note: Component output 1 is the primary connection and is used for the main display. Component output 2 through 8 follow the main display. The Component displays attached to the 1x8 Component CAT5 Distribution Amplifier **MUST** have the same native resolution in order to get a picture.

# FEATURES

---

## Features

- Distributes easily up to eight Component displays
- Extends each display up to 330 feet
- Maintains 480i, 480p, 720p, 720i, and 1080i, 1080p resolutions
- Distributes and extends Component or VGA video signals
- Installs in seconds

## Includes:

- (1) 1x8 Component CAT5 DA
- (1) 6' VGA to Component cable
- (1) 5V6A DC Power Supply
- (1) Users Manual

---

## **How to Connect the 1x8 Component CAT5 DA to your devices**

- 1** Connect the supplied VGA to Component cable from the Component video source into the 1x8 Component CAT5 DA Sender "Comp In" port.
- 2** Connect a CAT-5e\* cable from the "CAT5 Video Outs" on the 1x8 Component CAT5 DA Sender to the "CAT5 Inputs" on the Component CAT5 Distribution Receiver. (Repeat for each Receiver unit)
- 3** Connect the VGA to Component cable from the display to the "Comp Out" on the Component CAT5 Distribution Receiver. (Repeat for each Receiver unit)
- 4** Plug the 5VDC power supply into the 1x8 Component CAT5 DA Sender.

## HOW TO ADJUST THE PICTURE

The first step in adjusting the video quality is to display text and a graphic on your monitor (i.e. desktop icons). Then set your computer to the resolution that you will be using most frequently. The dip switches are used to set the focus and sharpness of the picture to the best possible setting. Set the dip switches to the settings that are recommended for the different lengths of CAT5 cable (see chart below). Verify that the picture quality is to your satisfaction. If the recommended setting does not produce a great quality picture, try using a different dip switch setting. The trim pod next to the Component connector on the 1x8 Component CAT5 DA R allows brightness adjustments for video.

0-25 Feet	All dip switches OFF for all colors.
26-100 Feet	Set dip switch #1 ON all colors. 2,3,4 remain OFF.
101-200 Feet	Set dip switch #2 ON all colors. 1,3,4 remain OFF.
201-300 Feet	Set dip switch #3 ON all colors. 1,2,4 remain OFF.
301 Feet and Up	Set dip switch #4 ON all colors. 1,2,3 remain OFF.

NOTE: The dip switches are set to the OFF position when the switch is closest to the number or in the down position.

## WARRANTY

---

Gefen Inc. warrants the equipment it manufactures to be free from defects in material and workmanship.

If equipment fails because of such defects and Gefen Inc. is notified within two (2) year from the date of shipment, Gefen Inc. will, at its option, repair or replace the equipment, provided that the equipment has not been subjected to mechanical, electrical, or other abuse or modifications.

Equipment that fails under conditions other than those covered will be repaired at the current price of parts and labor in effect at the time of repair. Such repairs are warranted for ninety (90) days from the day of reshipment to the Buyer.

This warranty is in lieu of all other warranties expressed or implied, including without limitation, any implied warranty or merchantability or fitness for any particular purpose, all of which are expressly disclaimed.

1. Proof of sale may be required in order to claim warranty.
2. Customers outside the US are responsible for shipping charges to and from Gefen.
3. Copper cables are limited to a 30 day warranty and cable must be free from any scratches, markings, and neatly coiled.

The information in this manual has been carefully checked and is believed to be accurate. However, Gefen Inc. assumes no responsibility for any inaccuracies that may be contained in this manual. In no event will Gefen Inc., be liable for direct, indirect, special, incidental, or consequential damages resulting from any defect or omission in this manual, even if advised of the possibility of such damages. The technical information contained herein regarding 1x8 Component CAT5 DA features and specifications is subject to change without notice.
