1:3 HDMI Splitter

1x HDMI input, 3x HDMI outputs

The 1x3 HDMI splitter allows set-top boxes, DVD players, D-VHS players and other HDTV devices with HDMI™ output to be connected to three or more HDTV displays.

How It Works

Gefen's 1x3 HDMI™ splitter is a distribution hub that sends the same video output to three or more HDTV digital displays. It is a flexible solution that accommodates multiple displays. When two or more HDMI splitters are connected together, they can be used to create a larger distribution. The HDMI splitter is connected using a HDMI cable from the HDMI source to the HDMI splitter input. There are three HDMI outputs. HDMI output 1 is the primary connection and is used for the main display. Outputs two and three follow the main display.

Product Notes: Do not use DVI displays for an HDMI source; They must be HDMI displays. Only with a DVI source can the display types be either DVI or HDMI.

- Input HDMI, output only HDMI
- Input DVI, output DVI or HDMI

This HDMI product supports BOTH Audio and Video signals.

DVI, HDCP & HDMI Defined

Note:

All displays that cannot show the same video resolution(s) as the Primary Display connected to Output #1 may fail to show a picture. Secondary displays follow the Primary by sharing the resolution and capability information (EDID) obtained from the Primary Display.
