

## 1 VGA source to 2 displays

### 1:2 VGA Hub

#### One VGA Input, Two VGA Outputs

The 1:2 VGA Hub allows computers with VGA graphic cards to be connected to one or two VGA compatible monitors or projectors. The VGA splitter keeps your desk clutter-free, relocating your computer to a safe and secure area, while allowing you to work in a quieter environment. It also lets you keep your VGA next to your computer, while adding a second VGA display such as a projector, another VGA monitor or Plasma display.

#### How It Works

The 1:2 VGA Hub is connected with a VGA (male to female) cable from the computer VGA graphic port to the VGA Splitter input. There are two VGA outputs. VGA output one is the primary connection and is used for the main display. VGA output two is connected to the second display.

**Note:** EDID is passed from output #1.

#### Features:

- Connects computers with VGA graphics to two VGA compatible monitors or projectors
- Allows two VGA display monitors to be connected at the same time to the same video source
- Simultaneous display at local and remote locations
- Maintains highest highest video resolution up to 1920 x 1200

#### Specifications:

- VGA Amplifier Bandwidth: 350 MHz
- Input Video Signal: 1.2 Volts p-p
- Power Supply: 5 VDC (External)
- Power Consumption: 10 Watts (max.)
- Shipping Weight: 4 lbs.
- Dimensions: 5.625"W x 1.125"H x 2.625"D

#### Package Includes:

- 1:2 VGA Hub
- 6ft. VGA cable (M-F)
- 5v power supply

# INTRODUCTION

---

Congratulations on your purchase of the 1:2 VGA Hub. Your complete satisfaction is very important to us.

Gefen's line of HDTV switches, extenders, and splitters are designed to make your A/V equipment use more comfortable, more productive and less expensive.

Gefen's 1:2 VGA Hub is a distribution hub that sends the same video output to two VGA screens. It is a flexible solution that accommodates multiple displays. When two or more 1:2 VGA Hubs are connected together, they can be used to create a larger distribution.

The 1:2 VGA Hub is connected using a VGA cable from the VGA source to the 1:2 VGA Hub input. There are two VGA outputs. VGA output 1 is the primary connection and is used for the main display. VGA output 2 follows the main display.

Gefen products offer solutions for noise, space and security concerns, data center control, information distribution, conference room presentation, school and corporate training environments.

## Our Commitment

Gefen will always offer the finest quality product at the best possible price. Included in that price is a lifetime of support from a team of outstanding engineers.

# FEATURES

---

## Features

- Connects computers with VGA graphics to two VGA compatible monitors
- Allows two VGA displays to be connected at the same time to the same video source

## WARRANTY

---

Gefen Inc. warrants the equipment it manufactures to be free from defects in material and workmanship.

If equipment fails because of such defects and Gefen Inc. is notified within two (2) year from the date of shipment, Gefen Inc. will, at its option, repair or replace the equipment, provided that the equipment has not been subjected to mechanical, electrical, or other abuse or modifications.

Equipment that fails under conditions other than those covered will be repaired at the current price of parts and labor in effect at the time of repair. Such repairs are warranted for ninety (90) days from the day of reshipment to the Buyer.

This warranty is in lieu of all other warranties expressed or implied, including without limitation, any implied warranty or merchantability or fitness for any particular purpose, all of which are expressly disclaimed.

1. Proof of sale may be required in order to claim warranty.
2. Customers outside the US are responsible for shipping charges to and from Gefen.
3. Copper cables are limited to a 30 day warranty and cable must be free from any scratches, markings, and neatly coiled.

The information in this manual has been carefully checked and is believed to be accurate. However, Gefen Inc. assumes no responsibility for any inaccuracies that may be contained in this manual. In no event will Gefen Inc., be liable for direct, indirect, special, incidental, or consequential damages resulting from any defect or omission in this manual, even if advised of the possibility of such damages. The technical information contained herein regarding 1:2 VGA Hub features and specifications is subject to change without notice.
