# 1-TURN POTENTIOMETER

(Precision 1-turn, Wirewound & Conductive Plastic Element)

SAKAE 1-turn Potentiometers are fully continuous rotation potentiometers without stopper and are highly reliable in offering an excellent quality as well as a prolonged rotating life. There are 2 kinds of resistive element available in this series: Wirewound (**CP**) and Conductive Plastic (**FCP-A**) elements. You can easily make a best selection between these versions to your versatile application programs ranging from hand-operating use to servo applications.

**CP** or **FCP-A** is respectively contained in an aluminum housing case processed by electrolytic corrosion-proof plating in silver color (**CP**) and black color (**FCP-A**) with performances and dimensions according to U.S. MIL, and V.R.C.I. Standards. They are light in weight and small in size as well as of rigid construction. Selection of any desired item is possible among a variety of standard models, of which diameters are variable between 12mm and 50mm.
