Setting big things into motion.

Industrial Controllers Catalog 2015

GESSMANN®

Industrial Controllers

Tool for Designers, Engineers and Purchasing Agents

Your tool for finding industrial controllers for cranes, electro-hydraulic systems, floor conveyors, industrial applications, ships, rail vehicles, and construction machinery of any kind, joysticks and masterswitches with electronic interface adjustment for all machines matching our product portfolio. Take advantage of our **fold-out order tool** on this page and the **detailed tables of contents** at the beginning of each position.

Product range

As of 2015

Product Portfolio

Gessmann is an international market leader. Our success in the market is based upon our decisive focus on innovative product development and the highest possible standards when it comes to quality. Our product range includes:

- Multi-axis controller, double-handle controller, control switch (master-switch), gear limit switch for hoisting, electro-hydraulic application, material-handling technology and remote control
- Geared limit switch for joisting equipment
- Complete crane control unit, portable control unit, pendant control unit, including wiring for all types of cranes, vehicles and industrial applications
- Operating panels for construction machinery, industrial applications, vehicles and harvesting machines
- Control pedestals, ship-operating transmitters, sensor units and actual-value transmitters for ship drives
- Pedal controllers for welding machines, road and rail vehicles
- Master controllers, panels and control stations for rail vehicles
- Displays for forklifts and construction machinery
- Proportional control electronics for solenoid valves
- Interface electronics with digital and analog outputs matching our controllers
- Interface electronics with Profibus interface or CAN-bus interface matching our controllers (input/output cards)
- DC controllers, selector switches (signal controllers) for high-voltage systems
- Customized solutions for operating devices and electronic units for any type of machinery and vehicles

Management certification:

ISO 9001 Certified

IRIS Certification

General Terms and Conditions

GESSMANN
Industrial Controllers

For our general conditions for sale and delivery please refer to our website at www.gessmann.com

Please also note:

Our catalog prices do not include value added tax, which is added separately.

The prices are ex-works in Leingarten excluding packaging. Packaging is charged at cost and cannot be returned. For orders below EURO 150.00 our gross prices are applicable. The minimum invoice amount is EURO 80.00, regardless of the value of the delivered goods. Therefore, we recommend combining small orders.

We are entitled to pass on any additional handling and production costs resulting from modifications to the order caused or requested by the customer (both technical modifications and non-compliance with deadlines).

Our periods of payment are: 30 days without a discount.
These conditions of payment shall be deemed agreed and accepted upon receipt of our written confirmation of orders.

All delivered goods shall remain our sole and absolute property until full payment is received.

The delivery period only commences upon clarification of all technical details. Unforeseen circumstances justify an appropriate extension of the delivery period. All documents, such as drawings, dimensional drawings, circuit diagrams, etc., are non-binding. We reserve the right to make any changes necessary, in particular changes which serve the technical advancement.

The exclusive place of jurisdiction is 74072 Heilbronn, Germany.

Warning

Certain parts of this electrical device carry hazardous voltages when in operation.
Installation, maintenance, modification or retrofitting may only be carried out by qualified personnel in consideration of the appropriate safety precautions.
Non-compliance may result in death, severe injuries or substantial property damage.

Multi-axis controller
V6 / VV6

GESSMANN Industrial Controllers

The multi-axis controller V6 / VV6 is available in either single-axis or multi-axis options and is a robust controller used commonly in electro-hydraulic applications.
The modular design and many possibilities of combination with our handles enables the switching device to be used universally.
The V6 / VV6 is resistant to oil, maritime conditions e.g. offshore / vessels, UV radiation typically from the sun.

Multi-axis controller
V24

GESSMANN Industrial Controllers

The association drive V24 is designed as a driving joystick for construction and agricultural machinery. It has a parking position which can be inserted in the zero position. The V24 is characterized by its extremely rugged design.
Through it`s various interfaces and the many possibilities of combination with our numerous ball handles the V24 is very flexible.

Technical data

Mechanical life V24	20 million operating cycles
Supply voltage	see interface
Operation temperature	-40°C til +60°C
Degree of protection	IP 54
Functional safety	PLd (EN ISO 13849) possible

1

Example

V24	P1	T	- R	- E...	- X

Basic unit

V24.1	Multi-axis controller, 1-axis
V24L	Multi-axis controller, 1-axis with parking position left
V24R	Multi-axis controller, 1-axis parking position right

Gate

P1	T-gate main axis axial *(included in basic unit!)*
P2	T-gate main axis right outside
P3	T-gate main axis left outside
PX	Special gate

Grip / Palm grip

	Knob *(included in basic unit!)*
T	Dead man
H	Signal button
D	Push button
B...	Palm grip B... *(see page palm grip 128)*

Main axis

R	Friction brake adjustable *(included in basic unit!)*

Interface *(description see on the following pages)*

E3xx	CAN-interface
E4xx	CANOpen Safety interface

Special model

X	Special / customer-specific

V2015/1 10.02.2015

Multi-axis controller
V25

GESSMANN Industrial Controllers

The multi-axis controller V25 is available in either single-axis or multi-axis options and is a robust controller used commonly in electro-hydraulic applications.
With many output options including voltage, amperage and switching contacts and many handle options the V25 series is hugly customisable.
The V25 is resistant to oil, maritime conditions e.g. offshore / vessels, UV radiation typically from the sun.

Control switch
N6

GESSMANN
Industrial Controllers

The control-switch N6 is a rugged switching device for hoisting applications.
The modular design enables the switching device to be used universally.
The single-axis controller is resistant to oil, maritime conditions e.g. offshore /vessels, UV radiation typically from the sun.

Utilization categories for control switches to IEC/EN 60947-5-1

Type of current	Utilization category	Typical examples of application	Normal conditions of use					
		I= current made, Ic= current broken Ie= rated operational current, U= voltage before make Ue= rated operational voltage Ur= recovery voltage T 0,95= time in ms, to reach 95% of the steady-state current. P= UE · Ie= steady-state power consumption in watts	Make			Breake		
			I / Ie	U / Ue	cos	Ic / Ie	Ur / Ue	cos
alternating current	AC12	Control of resistive loads and solid state loads with isolation by opto couplers control of a.c. electromagnetic loads (> 72 VA)	1	1	0,9	1	1	0,9
	AC15		10	1	0,3	1	1	0,3
			I / Ie	U / Ue	t 0,95	Ic / Ie	Ur / Ue	t 0,95
Direct current	DC 12	Control of resistive loads and solid state loads with isolation by opto couplers Control of d.c. electromagnets	1	1	1 ms	1	1	1 ms
	DC 13		1	1	6 · P	1	1	6 · P

The value 6·P results from an empirical relationship with is found to represent most d.c. magnetic loads to an upper limit of P = 50 W viz 6·P = 300 ms. Loads having power consumption greater than 50 W are assumed to consist of smaller loads in parallel. Therefore 300 ms is to be an upper limit, irrespective of the power consumption value.

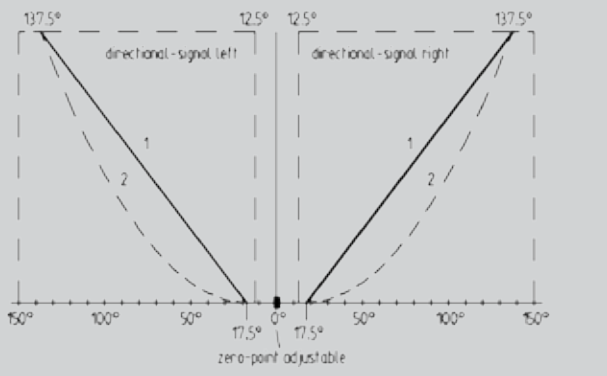
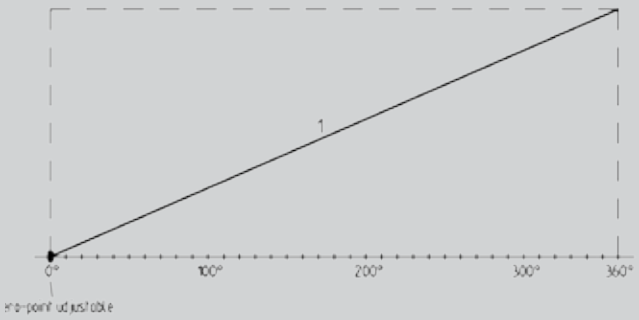
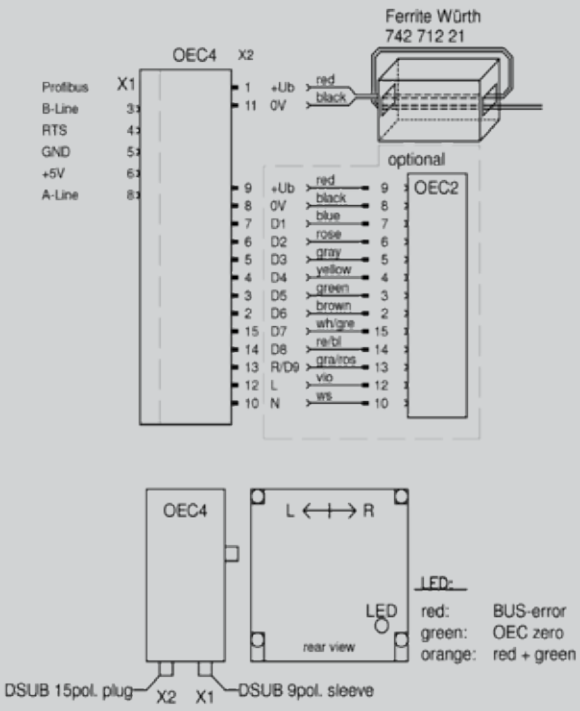
	9 Bit Binary-Code T497 linear on sided left turn	OEC 4-6-5-2	C325	820g







Attachment

Plug (Profibus) straight

Plug (Profibus) 90° angled

Plug with cable 2x0,25 qmm, 2000 mm long, cable head open (cable for current supply OEC 4 single application)

Plug with 2 cable (14x0,25 qmm, 2x0,25 qmm), cable head open (Connection cable OEC 4 / OEC 2 for OEC 2 incl. cable for current supply)

The OEC 4 is able for mounting on V6,VV6/D64,DD64/V11/S2,SS2/S6/N6. For mountig a potentiometer mounting option (P) of the respective controller is required! For a controller with one axis is required 1 piece of OEC 4, for a controller with 2 axis are required 1 piece of OEC 4 and 1 piece of OEC 2.

Technical details may vary based on configuration or application! Technical data subject to change without notice!

V2015/1 10.02.2015

Electronic control unit ES/43

The electronic control unit ES/43 serves for control of proportional valves without position control. There is a version for 4 proportional valve solenoids (ES / 43-10) and a version for 2 Proportional valve solenoids (ES / 43-11) available.

Example

Features:

- Stabailized voltage
- Chopper output stage with adjustable frequency
- Ramp time setting ON/OFF delay
- Creep speed circuit adjustable
- Solenoid current setting separate for minimum current and maximum current
- Output current controlled independently of temperature and solenoid
- Power output short-circuit-proof with overload protection
- Voltage input protected against polarity reversal
- Mechanical selection of direction by means of contacts
- LED operating voltage and working display
- Microprocessor technology therefore especially adaptable

Technical data:

- Supply voltage		10...	32 V DC
- Residual ripple		20%	
- Control voltage range	Ue	0...	5V
- Control current	Ie	< 1 mA	
- Dither frequency	f	25...	250 Hz
- Proportional valve S 1-4	I min.	0...	1 A
Output	I max. = I min ...		2 A at 12 Volt
Output	I max. = I min ...		1 A at 24 Volt
- Ramp time setting	t on	0,2...	25 sec
	t off	0,2...	25 sec
- Creep speed	variable reduction		25...75%
- Operating temperature	-20°C til +60°C		
- Storage temperature	-40°C til +80°C		

Electronic control unit for 4 proportional valves solenoid ES/43-10

Electronic control unit for 2 proportional valves solenoid ES/43-11

Palm grip
B14 / B15

GESSMANN Industrial Controllers

The palm grip B14/B15 has different equipment options for many requirements.
It is compatible with our multi-axis and single-axis controller or mounted on hydraulic drives.
The palm grip has a highly flexible single wire (0,1 qmm, 450 mm long).
The mounting piece for the drive rod can be supplied with a tapped hole 12 mm (standard) or 10 mm.

Technical data

Operation temperature	-40°C til +60°C
Degree of protection	IP 65
Contact complement	0,1A 24VDC13

Crane control unit
KST 4 swiveling

GESSMANN Industrial Controllers

The KST 4 is an ergonomically designed swiveling crane control chair which provides a high degree of comfort.

Equipment boxes:
The sheet steel equipment boxes are vertically and horizontally adjusted. The arrangement of the joysticks, indicators and control devices is customised according to customer specifications.
Cabling is run through aduct in the cross-member. (Terminal block)
Special boxes available upon request.

Driver seat:
As standard the KST 4 is fitted with a KFS 11 seat. The seat itself is fitted with a hydraulic vibration absorption system complete with weight adjustment to ensure that the comfort level is fitted with armrests and a headrest. There is the option to have the seat covered with air-permeable artificial leather.

Cross-member with swivel base:
The cover of the sheet steel cross-member including the driver's seat is forward foldable.
Thereby all wirings, terminals and bushings are easily accessible during commissioning and maintenance.
Swivel base has zero-clearance bearing and can be locked by a friction brake.

Surface treatment:
Base coat and textured varnish
Standard colour RAL 9011 black

V2015/1 20.08.2015

Crane control unit
KST 5 swiveling

GESSMANN Industrial Controllers

The KST 5 is an ergonomically designed swiveling crane control chair which provides a high degree of comfort.

Equipment boxes:
The equipment boxes are made from sheet steel and as standard have a hinged lid with locking feature. This allows for easy inspection and maintenance. The side of the equipment boxes is as standard fitted with an inspection plate which again is lockable. The arrangement of the joystick, indicators and control devices is cutomised according to customer specifications. This combined with the custom sized and pro-filed equipment boxes that are available means that the KST 5 is very flexible and customisable solution.

Driver seat:
As standard the KST 5 is fitted with a KFS 11 seat. The seat itself is fitted with a hydraulic vibration absorption system complete with weight adjustment to ensure that the comfort level is fitted with armrests and a headrest. There is the option to have the seat covered with air-permeable artificial leather.

Cross-member with swivel base:
The cover of the sheet steel cross-member including the driver's seat is forward foldable.
Thereby all wirings, terminals and bushings are easily accessible during commissioning and maintenance.
Swivel base has zero-clearance bearing and can be locked by a friction brake.

The KST 6 is an ergonomically designed swiveling crane control chair which provides a high degree of comfort.

Equipment boxes:
The sheet steel equipment boxes are vertically and horizontally adjusted. The arrangement of the joysticks, indicators and control devices is customised according to customer specifications.
Cabling is run through adcut in the cross-member. (Terminal block)

Driver seat:
As standard the KST 6 is fitted with a KFS 11 seat. The seat itself is fitted with a hydraulic vibration absorption system complete with weight adjustment to ensure that the comfort level is fitted with armrests and a headrest. There is the option to have the seat covered with air-permeable artificial leather.

Cross-member with swivel base:
The cover of the sheet steel cross-member including the driver's seat is forward foldable.
Thereby all wirings, terminals and bushings are easily accessible during commissioning and maintenance.
Swivel base has zero-clearance bearing and can be locked by a friction brake.

Surface treatment:
Base coat and textured varnish
Standard colour RAL 9011 black

Example

V2015/1 20.08.2015

Crane control unit
KST 7

GESSMANN Industrial Controllers

The KST 7 is an ergonomically designed swiveling crane control chair which provides a high degree of comfort.

Equipment boxes:
The equipment boxes are made from sheet steel and as standard have a hinged lid with locking feature. This allows for easy inspection and maintenance. The side of the equipment boxes is as standard fitted with an inspection plate which again is lockable. The arrangement of the joystick, indicators and control devices is cutomised according to customer specifications. This combined with the custom sized and profiled equipment boxes that are available means that the KST 7 is very flexible and customisable solution.

Driver seat:
The tipped spring mounted seat KFS 4 is fit with an hydraulic vibration absorption system incl. weight adjustment. With the folding spring mounted seat you can also arrive your workplace in small cabins.

Base plate:
The cran control unit is available with or without base plate.

Surface treatment:
base coat and textured varnish
Standard colour RAL 7032 pebble-grey

Portable control unit
TS 1

GESSMANN Industrial Controllers

TS 1	- SB 1	- RH 1	- K 4	- HS 1	/	V...	/	KLS	/	X

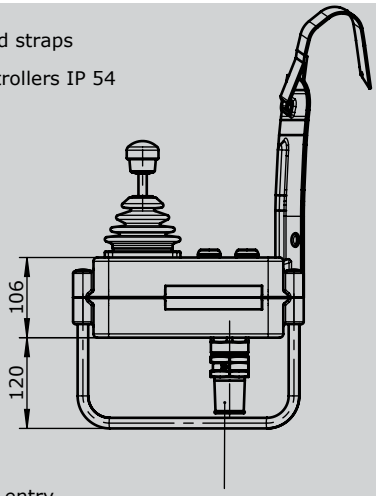
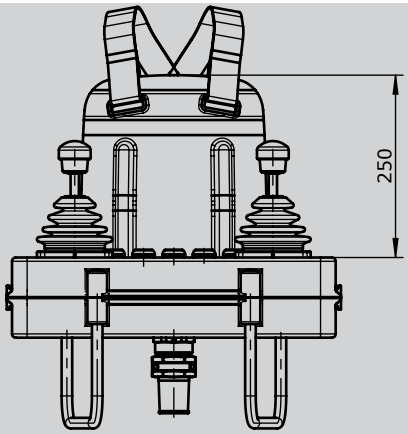
Special model	
X	Special / customer-specific
X1	Housing antistatic design < 10^9 Ohm/cm
X2	Finishing colour yellow RAL 1021

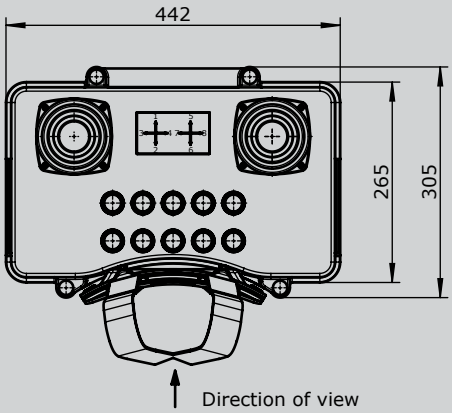
3

With chest plate and straps
Protection IP 65
with multi-axis controllers IP 54

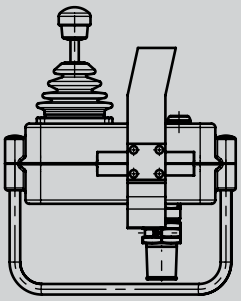


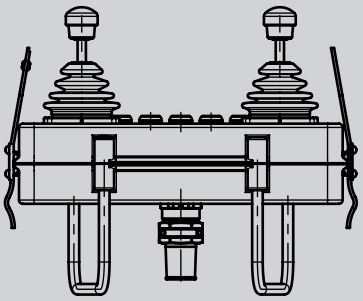
Cable entry
with anti-kink protection
and stain relief or connectors





With adjustable carrying strap
Protection IP 65
with multi-axis controllers IP 54





3

Portable control unit
TS 2

GESSMANN Industrial Controllers

The portable control unit TS 2 is used for controlling and monitoring the necessary equipment.
The chest panel and straps enable the operator to carry it without becoming tired.
An adjustable carrying strap can also be fitted for use without the chest plate.

Surface treatment:
Priming and structur-finishing paint
Standard colour RAL 7032 pepple-grey

Technical data:

Operation temperature	-40°C to +60°C
Degree of protection	IP 65

Example

TS 2	- SB 1	- RH 1	- K 4	- HS 1	/	V...	/	KLS	/	X

Naval cruise controller
AZ1

The naval cruise controller AZ1 is a rugged switching device.
The modular design enables the switching device to be used universally.

The design includes:
The mechanical control-system for the engine speed 0-max. rpm. switching angle 60 degrees with pressure print at 7 degrees and friction brake direction 0-2.
The mechanical control-system for the steering left/right direction 13-14, 360 degrees with pressure points 4x90 degrees and friction brake.

The AZ1 is resistant to oil, maritime climate, ozone and UV radiation.

Technical data

Mechanical life AZ 1	12 million operating cycles
Operation temperature	-40°C til +60°C
Degree of protection	IP 66

Example

AZ1	- L	- N	E2112	- X

Basic unit

AZ1 Naval cruise controller

Options

L Scale illuminated (LED) 24V dimmable

N Follow-up control system 24 Volt DC for direction 0-2 and 13-14

Interface

Voltage output (not stabilized)

Supply voltage 4,75-5,25VDC

	Characteristic: 1= contra rotating, 2= concurrently rotating	
0,5...2,5...4,5V redundant per axis	1 axis	E103 1
	2 axis	2

Voltage output

Supply voltage 9-32VDC (*11,5-32VDC)

	Characteristic: 1= contra rotating, 2= concurrently rotating	
0,5...2,5...4,5V redundant per axis	1 axis	E111 1
	2 axis	2

Output power

Supply voltage 9-32VDC

	Characteristic: 1= contra rotating, 2= concurrently rotating	
4...12...20mA redundant per axis	1 axis	E211 1
	2 axis	2

Gear limit switch
GE 1 / GE 2

GESSMANN Industrial Controllers

The gear limit switch GE 1 / GE 2 is a rugged switching device designed for hoisting applications.
The modular micro changeover contacts with positive opening operation.
The device is programmed by means of stepless adjustment of double cam disks, which can be provided from 18° to 192° contact disks according to the switching program required.
The type GE 1 includes a double cam disk conjointly lockable.
The type GE 1 includes a double cam disk conjointly lockable.

Technical data

Mechanical life GE1/GE2	10 million operating cycles
Operation temperature	-40°C til +60°C
Degree of protection	IP 65
Colour	RAL 7032 pebble grey

V2015/1 10.02.2015

DC-Contact
SO 1.10 Normally closed (NC)
SS 1.10 Normally open (NO)

The DC contact block is used for signalling and announciation applications.
The snap-action mechanism prevents slow contact opening when the plunger is operated slowly. Quenching of the arc that occurs with DC is suopported by two-capacity permanent magnets.

These are arranged so that the polarity can be ignored when connecting +/- cabling. However, the polarity of the quenching magnets must be noted when installing the contact blocks to prevent the magnets adversly affecting each other. Contact blocks in four different colours are available for polarity identification of the magnets when fitted.

The contact blocks may only be installed on non-magnetizable materials with screw, etc. made of non-ferrous metal.

The self-cleaning silver contacts are designed for low switching frequency, low currents and voltages. Gold coated contacts can be supplied (approx 0,2µ), less than 42 Volt required. The screw connection M3.5 at the side is suitable for 2 conductors max. 2,5mm². The plug-in connection at the top 4.8 x 0.8 mm DIN 46247.

Several contact blocks can be plugged on the top of each other and operated jointly. The plug-type terminals are then only accessible on the top unit. The contact blocks can be provided with shock protection to DIN VDE 0106 Part 100.

Example

	Switching capacity		
	NC	NO	Time constant
250 V DC	2 A	1 A	20 ms
125 V DC	4 A	3 A	20 ms
50 V DC	6 A	6 A	20 ms
30 V DC	10 A	10 A	20 ms
250V AC 15	6 A	6 A	

Technical data

Mechanical life	2 million operating cycles
Electrical service life	50.000 operating cycles (at 2A 250VDC L/R 20 ms)
Operation temperature	-40°C til +60°C
Degree of protection	IP 40
